

PCA Vincennes Participates in Local “Tour of Opportunity”

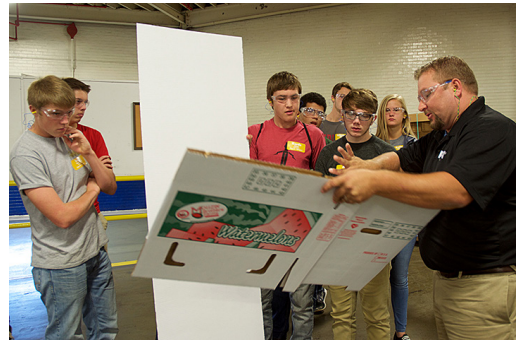

March 15, 2016

PCA's plant in Vincennes, Indiana, recently participated in “Opportunity Knocks — Tour of Opportunity,” coordinated by the Knox County Development Corporation. This event allows high school juniors to learn about career opportunities and see the operations at some of the county's leading companies firsthand.

PCA showed students around the plant, explained the machinery and capabilities, and spoke about the many different careers in the U.S. corrugated industry.

According to the General Manager at Vincennes, “We are fortunate to have this platform to speak with high school students about career paths for those that choose not to go to college.”

To learn more about Knox County's “Tour of Opportunity,” please visit their website at www.kcdc.com.

High school juniors from Knox County, Indiana, visited PCA Vincennes to learn about career opportunities in the corrugated industry.
